

2021 RULEBOOK **AUTOSTART SETTINGS**

Changes from last season are made in **BLUE**.

Revisions during the season are made in **RED**.

Posted **12/10/20**

The Compulink AutoStart system is integrated into every class that is run at XDA. This system starts the tree automatically when the Compulink senses two fully staged bikes so the starter can concentrate more on the track and conditions of the race.

Here's how it works: When the system sees both bikes pre-staged and one of the bikes stages, it starts the "timeout". If the second bike does not fully stage before the timeout is over, a red light is activated for that bike. This red light will NOT be negotiated under any circumstances! Remember, the system needs to see three lights before it starts the timer (two pre-stage lights and one stage light).

| Class | Staged Minimum | Staged to Start | Timeout |
|----------------------|----------------|-----------------|------------|
| Pro Street | 0.5 | 0.8 | 7 seconds |
| Real Street | 0.5 | 0.8 | 7 seconds |
| Pro Xtreme | 0.5 | 0.8 | 7 seconds |
| Super Stock | 0.5 | 0.8 | 7 seconds |
| Running of the Bulls | 0.5 | 0.8 | 7 seconds |
| 4.60 Index | 0.5 | 0.8 | 7 seconds |
| 5.60 Index | 0.5 | 0.8 | 7 seconds |
| Top Sportsman | 0.5 | 1.1 | 10 seconds |
| Pro E.T. | 0.5 | 1.1 | 10 seconds |
| Street E.T. | 0.5 | 1.1 | 10 seconds |
| Grudge | 0.5 | 0.8 | 15 seconds |

- ☺ **Stage Minimum** is the amount of time tire breaks the beam to begin AutoStart.
- ☺ **Stage to Start** is the amount of time both bikes are staged to begin AutoStart countdown.
- ☺ **Timeout** is when one bike is pre-staged and staged, and the other bike is only pre-staged, this is the amount of time left before tree activates.
